Objective

Full Stack Developer with a background in Information Technology, focused on building practical, scalable solutions across front-end and back-end systems. Currently exploring AI agents and automation, with a strong interest in integrating intelligent systems into everyday workflows.

Education

KJ Somaiya College of Engineering

B.Tech in Information Technology (8.47 CGPA)

2022 – Present

Mumbai, India

RN Podar School

Senior Secondary Education (12th)

2020 – 2022

Mumbai, India

Technical Skills

Languages: Python, JavaScript (ES6+), Java, C++, C, Arduino C

Web & Mobile Development: React.js, Next.js, React Native, Expo, HTML5, CSS3, Tailwind CSS, Node.js, Express.js, Flask, Laravel, PHP, Android Studio

Databases MongoDB, PostgreSQL, MySQL, Redis

Security: JWT, Auth0

AI/ML: Pandas, NumPy, Ollama, Agentic AI, LangChain, OpenAI Agents SDK, Prompt Engineering, MCP, LLMs

Cloud, APIs & DevOps: AWS, Postman, HTTPie, Git, GitHub

Tools & Design: Figma, Adobe XD, Canva, Excel, PowerPoint, Word, Power Apps, Power Automate, AutoCAD, TinkerCAD

Professional Experience

Gourmet Gambit PVT LTD

Full Stack Development Intern

Jan 2026 – Present

Mumbai, India

- * Building an AI-powered chess learning platform using React Native, Node.js, and MongoDB. Developed scalable RESTful APIs for authentication, reels, comments, and user engagement. Implemented role-based access control with an admin dashboard. Engineered interactive chessboard modules for GM game replays, puzzles, and analysis. Integrated AI for move evaluation, blunder detection, personalized training recommendations, adaptive puzzle generation, and game insights to enhance the learning experience.
- * **Tools Used:** Expo, Android Studio, AWS, Auth0, Redis.

IDIOLISE SOLUTIONS

Intern

3 Weeks

Mumbai, India

- * Developed software bots using Microsoft Power Automate and Power Apps to implement hyperautomation by orchestrating end-to-end workflows involving form automation, database synchronization, web scraping, API integrations, and business process automation (BPA). Designed scalable low-code solutions to optimize operational efficiency and minimize manual intervention.
- * **Tools Used:** Microsoft Power Apps, Microsoft Power Automate.

Projects

TheraMind | *Python, NLP, Transformers*

- * **Github:** <https://github.com/Amanhegde25/TheraMind>
- * Designed an AI chatbot for mental health support using NLP and sentiment analysis.
- * Implemented emotional classification (stress, anxiety, etc.) using Hugging Face Transformers and spaCy.
- * **Tech Stack:** Python, Pandas, NumPy, NLTK, spaCy, Hugging Face Transformers, Transformers Pipeline API, Next.js

IDENTI-SCAN | *Python, OpenCV, Haar Cascades*

- * **Github:** <https://github.com/Amanhegde25/IDENTI-SCAN>
- * Built an automated attendance system using facial recognition by detecting faces in real time through Haar cascade classifiers.
- * Captured and matched facial features to verify identity and mark attendance automatically.
- * **Tech Stack:** Python, OpenCV, Haar Cascades, NumPy, Pandas

Statement Parser | *Python, Flask, Ollama, LLMs*

- * **Github:** <https://github.com/Amanhegde25/Statement-Parser>
- * Built an AI-powered financial statement parser that extracts structured transaction data from unstructured credit card statement PDFs using local Large Language Models (LLMs).
- * Implemented an offline AI pipeline with Ollama and Llama 3.2, enabling secure, privacy-preserving document processing without relying on cloud APIs or regex-based parsing.
- * **Tech Stack:** Python, Flask, Ollama, Llama 3.2, pdfplumber, Local LLMs, HTML, Jinja2

Certificates

Oracle: Agentic AI Certified Foundations Associate

Oracle: Cloud Infrastructure AI Foundations
